The benefits you receive working with us:

Efficiency boost

We will accelerate the processes in your company and reduce the number of possible mistakes. Thanks to our solution, making everyday decisions will be as easy as never before.

Cost reduction

Implementation of Microsoft Dynamics NAV software in your company will generate tangible financial results. It will allow you to deploy your employees and resources to other areas of sales. Our tool will simplify the information control and verification procedures by accelerating the flow and guaranteeing easier access to information.

Rapid response

We know the importance of time in running a business – that is why providing technical support to our Clients is of utmost priority to us.

Full customization

Just like any big enterprise, small businesses also need multiple advanced functionalities to handle their business processes. Our company will tailor the system to your individual needs. We will also make sure that each of the options you order is indispensable and used on an everyday basis. Such approach will optimize the costs of software implementation and support.
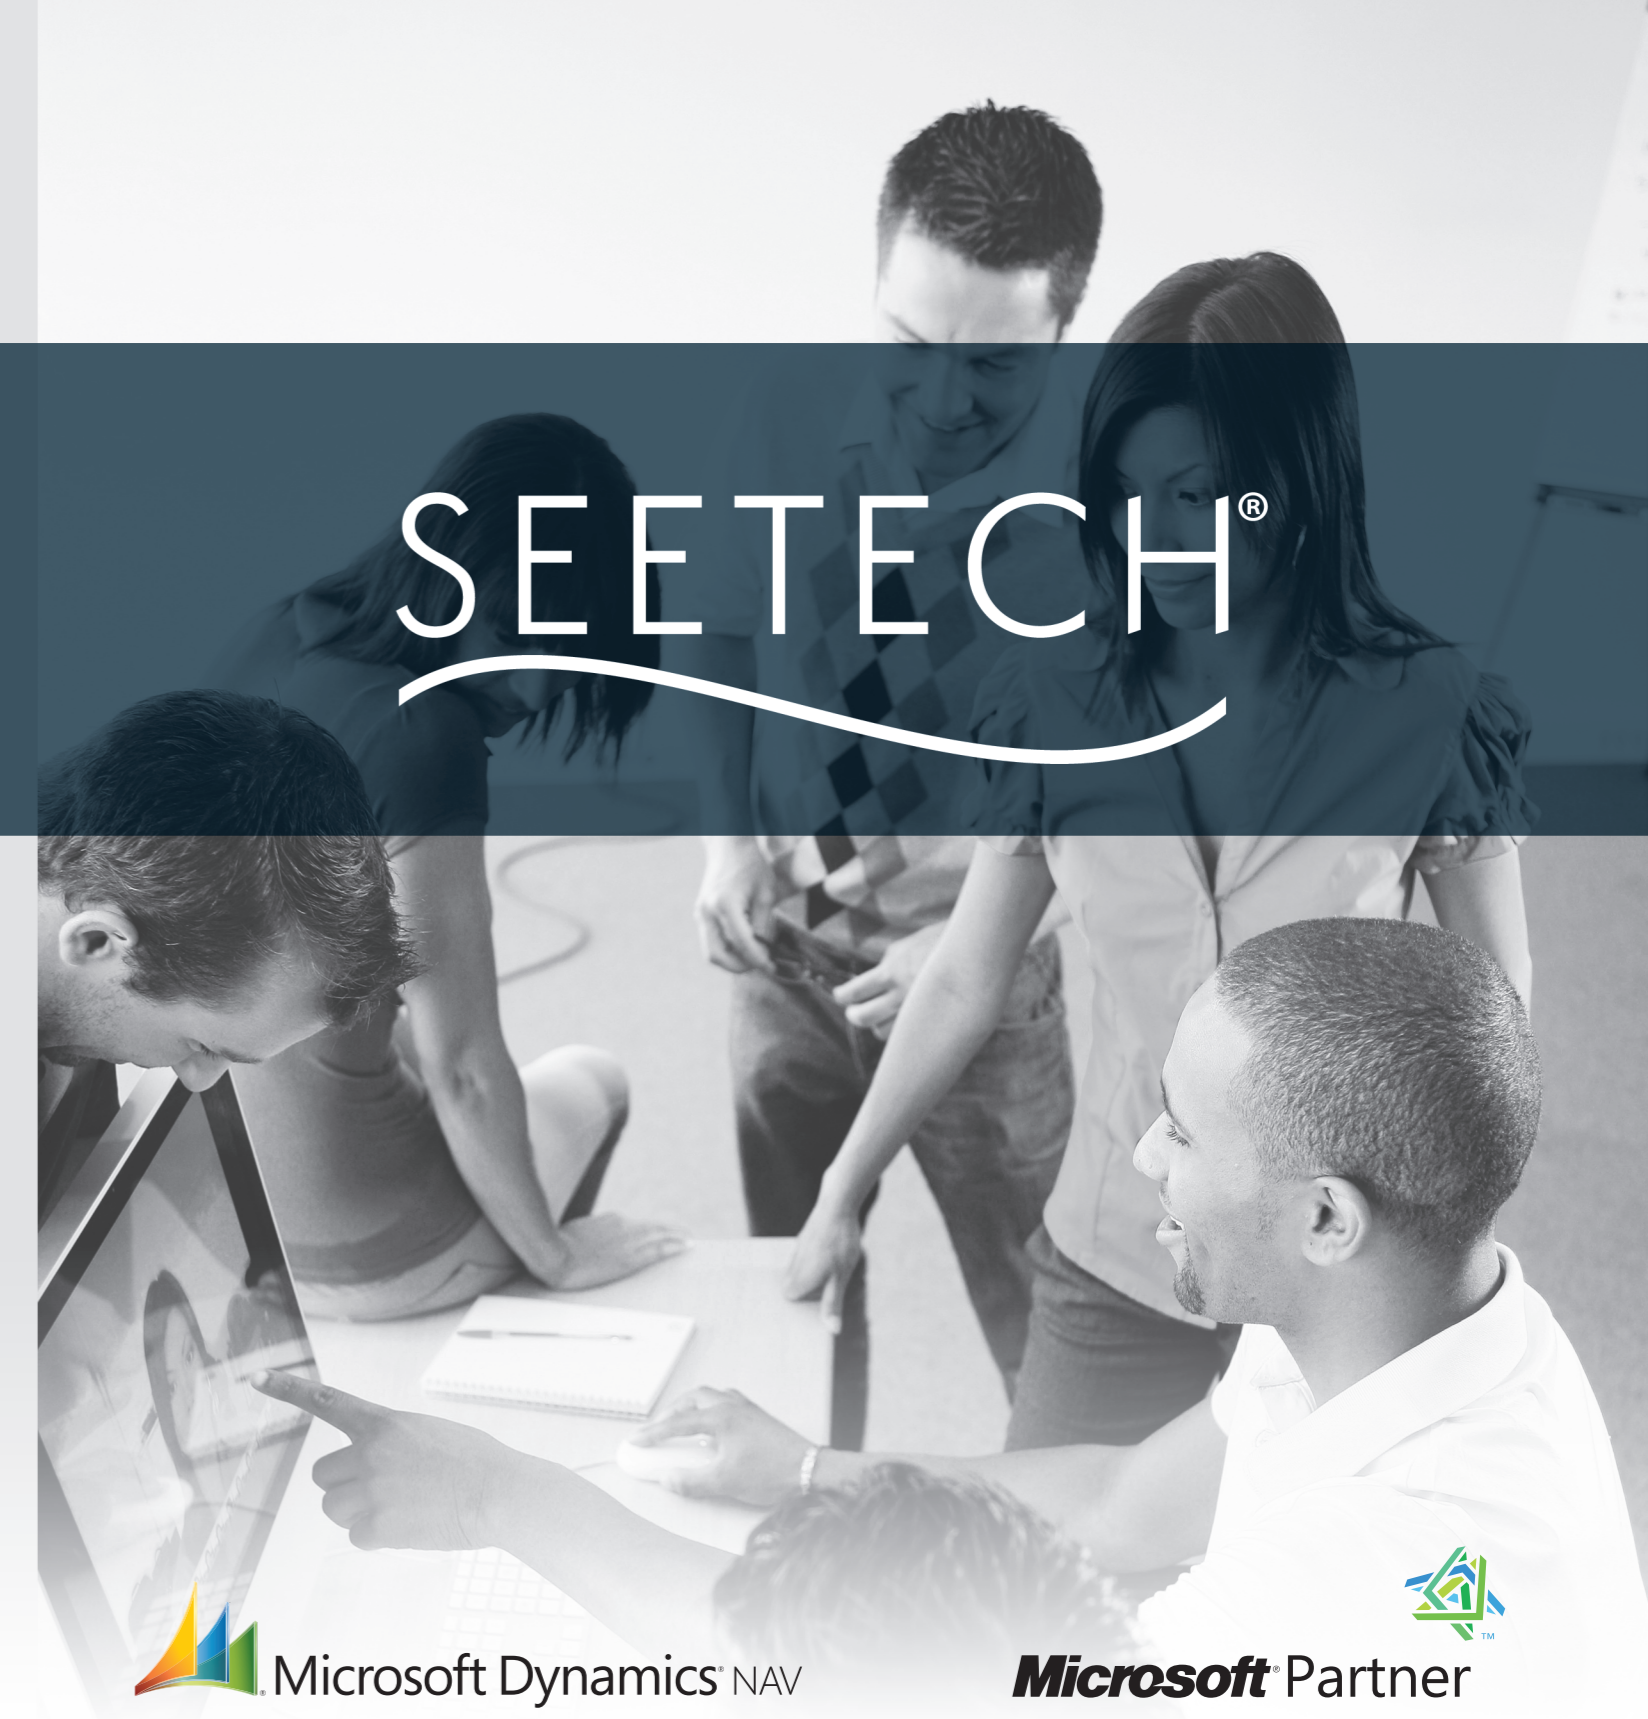

Competitive price

Prices of our solutions are highly competitive compared to the offer of other ERP systems implementation and support partners. Moreover, our implementation procedure and extensive experience in the business allows us to quickly and easily launch the system with the minimum costs involved.

SEETECH®

We have been working in the IT sector since 1997 and we have become a trusted and valued partner of Microsoft company. We specialize in IT solutions for business. Our team is composed of experienced consultants and experts in IT consulting and development who hold numerous certificates relevant to their profession. For more than a decade we have been sharing our knowledge and products with Clients working in various areas and sectors.

We also help small and medium businesses become more efficient and competitive. Moreover, we focus our efforts on our own development by continuously perfecting our solutions and creating new products. Our work has been appreciated both by our Clients and business partners; in 2007 we were awarded Microsoft Gold Certified Partner status. We managed to achieve excellent results and gain recognition thanks to the professional attitude of our consultants, as well as unmatched skills and high qualifications of our developers.

What makes us highly competitive in the business is the fast and comprehensive post-implementation support service, which is one of our greatest assets. The strong brand we have built allowed us to expand the scope of our activity over the entire territory of Poland. We also work with other Microsoft partners in Germany and Denmark.

Our mission is to

Build a Partnership with each Client.

Our priority is to gain in-depth understanding of our Clients' needs and we always strive to build and maintain long-lasting business relations with our Clients. Our Clients are like business partners to us. We provide them with our knowledge and share our experience also when our work is done. We promote new models of business processes, which may prove useful also in your company.

The list of our satisfied clients includes the following companies:

Metabo Polska: *As a result of implementation of one of Seetech solutions in our company, the work load necessary to handle banking transactions has significantly decreased, our corporate processes have been accelerated and have become more reliable.*

Walerian Błaszak, Financial Controller, Metabo Polska Sp. z o.o., Zygmunt Fila, President of the Company.

Gryfskand: *The module offered by Seetech turned out to be an indispensable solution in our company which has to deal with a very high number of internal processes. The simplicity of handling and data transparency are exactly what we have been looking for.*
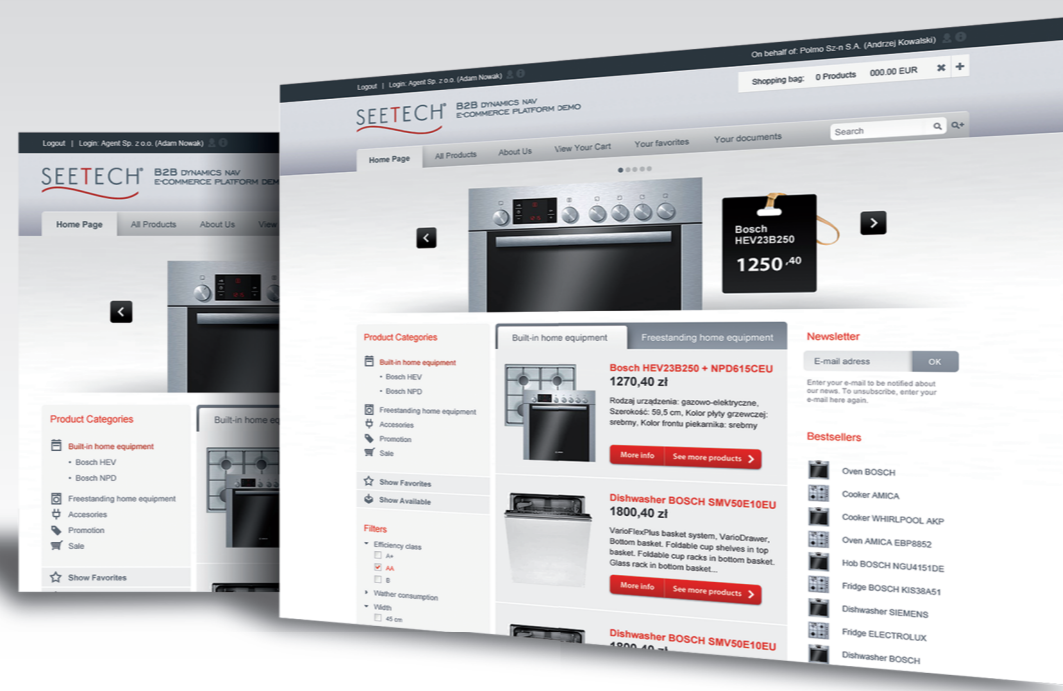

Zbigniew Rutkowski, Chief Accountant, Gryfskand Sp. z o.o.

Fire Stop: *The decision to buy Seetech module was spot-on. This investment yielded significant benefits, as the solution facilitated and simplified the work of our financial department.*

Bożena Szydłowska, Chief Accountant, Fire Stop Sp. z o.o.

EPEE Polska: *The functionality implemented in our company not only contributed to increasing the customer order processing efficiency, but also streamlined the work of the entire company.*

Sylwia Olbińska, President of EPEE Polska Sp. z o.o.

Microsoft Dynamics NAV software

Microsoft Dynamics NAV is a comprehensive tool for managing small and medium businesses, large enterprises and public administration institutions.

It has been applied by over a million users worldwide. The integrated system covers all company departments and allows to simplify and streamline business processes. It is also easy to implement and customize to fit the individual needs of a given entity. Intuitive and user-friendly operation of the system makes it possible for non-technical users to work with it. No matter what field your company is involved or what industry it operates in – Microsoft Dynamics NAV will satisfy your custom needs.

Microsoft Dynamics NAV offers you:

- A guarantee of further development of the software.
- A system tailored to your needs.
- Continuous monitoring of business processes.
- An easy way to make your everyday business decisions.
- A way to boost your employees' performance.
- Integration with other Microsoft products.
- A platform which supports the development of your company.

Proprietary solutions

Based on the experience of our Clients and their suggestions, we have developed additional functionalities integrated with **Microsoft Dynamics NAV** software. Thanks to our solutions, your company can operate even more efficiently.

B2B / B2C DYNAMICS NAV E-COMMERCE PLATFORM

Contributes to the automation of cooperation between business partners. Gives intelligent access to sales data to trade partners or hired agents. Enables to use the data through the Internet (website) with ease. The system also allows you to quickly and easily set up an online shop fully integrated with the Microsoft Dynamics NAV system.

RETAIL SALES

Enriches the functions of the Microsoft Dynamics NAV system with retail sales management. This module can work with POS devices and barcode scanners. It has been designed for small retail networks and single retail outlets. The solution can be equipped with a Product Guide, also called a 'clerk's assistant,' which can help your Customers find the products they are looking for.

ONLINE BANKING

This is a module designed for automatic, bidirectional communication between the company and its bank. It has a unique ability to learn through remembering the details of your Clients' bank accounts after they have been input in the system only once. With each new operation it can link the bank account number with corresponding receivables and liabilities. It settles all bank operations itself, thus saving the time of the financial and accounting departments personnel.

EASY WAREHOUSE

This solution helps you to manage your warehouse documents. This particular module allows you to create, save, book and print templates of customized documents used in warehouse management. This functionality will considerably simplify the process of drafting documents and minimize the efforts of your employees involved in warehouse inventory control.
